

## **Maroochydore Intersections Upgrade Project**

Project number: 24664

Council is upgrading three key intersections along Maud Street to improve road safety, accommodate future growth and to provide an efficient link to the new Maroochydore City Centre.

Signalised intersections are being constructed at Bungama and Dalby Streets and the Allambie Street intersection will be upgraded to a left in, left out arrangement.

### **Night work and detours scheduled for next week**

Council would like to advise local residents that asphalt (bitumen) road resealing work will be undertaken along Maud Street over several nights next week. This work must be undertaken at night as it requires road closures and detours.

Road works will take place over three, consecutive nights which will result in the temporary closure of Maud Street from Aerodrome Road to Dalby Street. Traffic will be detoured via surrounding streets.

Electronic signage and traffic controllers will be in place to help redirect motorists.

### **Hours of night works**

Road works will be performed between **8.00pm and 5.00am**, from **Tuesday 18 April to Thursday 20 April 2017** (weather and site conditions permitting).

Construction will involve removing the existing top layer of the road surface, laying new asphalt and line marking. Construction vehicles and heavy machinery will be in operation. Safety requirements dictate that reversing beepers must be used.

The project team is making every effort to minimise impacts on the community, however nearby residents may experience some noise and dust associated with these works.

Council apologises for any inconvenience and would like to thank you for your patience during the works.

Construction of the Maud Street intersections are on schedule for completion by the end of April.

Council has recently commenced work on the upgrade of two major intersections on Aerodrome Road. Work involves upgrading the First Avenue and Maud Street intersections, and constructing a new entrance to Maroochydore's new city centre.
